Introduction about Employee Engagement
Employee Engagement in the organization is a concept easily said and discussed than correctly understood. There is still a confusion and misdirection as to what exactly employee engagement is? Many of them misunderstand this concept as if it is like “Old Wine in the New Bottle”. Many consider employee engagement same as ‘sense of belongingness’ or psychological ownership of the task or a commitment towards organization or employee satisfaction. Still many look at it as Employee Welfare. But we would rather say that it is like “New Wine in the New Bottle”. It would be wrong to equate employee satisfaction and commitment as to what exactly employee engagement is? Many of them discussed than correctly understood. There is still a confusion and misinterpret this concept as if it is like “Old Wine in the New Bottle”. It would be wrong to equate employee satisfaction and commitment with the level of engagement. A satisfied and committed employee does not necessarily mean that he is really engaged.

Concept & Theoretical Background
W. D. Kahn (1990) is credited with conceptualizing the major components of employee engagement. He defined employee engagement as “the harnessing of organization members’ selves to their work roles; in engagement, people employ and express themselves physically, cognitively, and emotionally during role performances.”

The Gallup Organization, potentially the most widely recognized name associated with employee engagement defines engaged employees as those who “work with a passion and feel a profound connection to their company” and “drive innovation and move the organization forward” (GMU, 2006).

According to the Gallup, the consulting organizations there are three types of people in the organization: Engaged Employees work with passion and they feel a profound connection to their company. They drive innovation and move the organization forward”. They are builders of the organization. Not- Engaged Employees are essentially ‘checked out’. They are sleepwalking through their day, putting time- but not energy and passion-into their work.” They tend to concentrate on task rather than goal and outcomes they are expected to accomplish. Actively Disengaged Employees are the cave dwellers. They are consistent against virtually everything. They are just not unhappy at work; they are busy acting out their unhappiness. They sow seeds of negativity of every at every opportunity.

Sejits and Crim (2006), identified ten factors, named the ‘Ten C’s of Engagement’ – steps that the management may take to enhance the level of engagement of the employees. These may be enumerated as follows: Connect: it is the extent to which management convey that it cares for and values the employees. Career: extent to which the management provides to the workers that work that is challenging and meaningful and fostering one’s career growth. Clarity: the extent to which the goals, rules and the organizational operations are transparent and understood by the employee. Convey: the extent to which the management communicates goals and provides feedback. Congratulate: the extent to which good performance brings praise and recognition. Contribute: the extent to which one’s contribution to the ‘success and future’ of company is understood. Control: the extent to which the management conveys goals and provides feedback. Congratulate: the extent to which good performance brings praise and recognition.

LITERATURE REVIEW
Swatee et al. (2012), in their paper identified key dimensions of organizational culture and communication which can shape employee engagement in bank. Kinjal Bhatt (2012), while conducting a case study at GNFC on Employee engagement: a tool to achieve sustainable growth, noted that Employee Engagement in an organization can definitely enhance organization’s performance, productivity, pride and prestige. Employee Engagement depends on one’s professional knowledge, concern for job and motivation from superiors. In GNFC she found good working environment, sharing and openness to share views, training and development, good pay structure and perks, etc. which was responsible for high ratio of employee engagement. Bijay Kumar (2011), identified the factors of Employee Engagement which influence the performance outcome of organization. These factors included Factors Influencing Employee Engagement Recruitments, Job Designing, Career Development Opportunities, Leadership, Empowerment, Equal Opportunities and Fair Treatment, Training and Development, Performance Management, Compensation, Health and Safety, Job Satisfactions, Communication, Family Friendliness. The highest contributing factor employee recognition was powerful contributor more than any other variable.
Sharma et al. (2010) in their exploratory study to determine of Employee Engagement in a Private Sector Organization concluded that Objectivity & Recognition emerged as the critical determinants of organizational commitment which explained 93.9% of the variance in organizational commitment. Similarly, Career Opportunity and Pay emerged as the critical determinants of job involvement. These two variables together explained a little over 91% of the variance in job involvement.

Research Objectives
The main purpose of this research is to compare and study Employee Engagement Practices at Public and Private Banks. Secondly, the research work aims to analyze the cultural and Job related factors that promote Engagement Practices in these banks.

Research Methodology
The research design is descriptive in nature. The sample population is 100, comprising of 50 respondents from private sector banks and 50 respondents from public sector banks. The respondents were selected from South Gujarat Region through Convenience sampling method. Seven Private sector banks considered for the study are ICICI bank, AXIS bank, FEDERAL bank, HDFC bank, IDBI bank, HSBC bank, KOTAK MAHINDRA bank. Six Public sector Banks included in the study are Bank of Baroda, SBI, CBI, Dena bank, Bank of India, Punjab national bank. Structured questionnaire having 39 statements was used for data collection. Response was measured on a likert scale, 1 representing 'Strongly Disagree' and 5 representing 'Strongly Agree'.

Data Analysis & Findings
Data gathered during the survey was analyzed using mean and standard deviation to derive inferences.

Table: 1 shows Cultural factors that affects engagement practices in both banks.

Employees of the public sector banks are more satisfied as compared to private sector bank employees.

Conclusion

There is a vast difference in the variables that contribute to the Engagement practices in Public Sector Banks vis-à-vis the Private Sector Banks. In the PUBLIC SECTOR BANKS, in order of priority, following are the factors that have enabled HIGH EMPLOYEE ENGAGEMENT:

A: CULTURAL FACTORS:

i) Open Communication and Appreciating Loyalty
ii) Equitability and Knowledge Sharing
iii) Inter-Personal Orientation and Empowerment

B: JOB RELATED FACTORS:

i) Job Clarity
ii) Job Satisfaction
iii) Goal Achievement and Elasticity of Goal

Whereas in the PRIVATE SECTOR BANKS, in order of priority, following are the factors that have enabled HIGH EMPLOYEE ENGAGEMENT:

A: CULTURAL FACTORS:

i) Inter-personal orientation
ii) Loyalty and Open Communication and A Caring Culture
iii) Growth and Advancement

Table: 2 shows Job related factors that promotes engagement practices in these banks

B: JOB RELATED FACTORS:

i) Job Clarity
ii) Job Satisfaction
iii) Goal Achievement and Elasticity of Goal

Whereas in the PRIVATE SECTOR BANKS, in order of priority, following are the factors that have enabled HIGH EMPLOYEE ENGAGEMENT:

A: CULTURAL FACTORS:

i) Inter-personal orientation
ii) Loyalty and Open Communication and A Caring Culture
iii) Growth and Advancement
B: JOB RELATED FACTORS:
   i) Job Clarity
   ii) Elasticity of Goal
   iii) Feedback on Productivity, Goal Orientation and Commitment towards Performance

Similarly, if we compare those indicators that are least contributing to EMPLOYEE ENGAGEMENT in the PUBLIC SECTOR BANKS, they are:

A: CULTURAL FACTORS:
   i) Celebrating Success
   ii) Motivation
   iii) Participation, Ownership and Having Challenging Tasks

B: JOB RELATED FACTORS:
   i) Job Fit
   ii) Flexibility to work
   iii) Continuous Improvement

And, also listing the factors that least contribute to EMPLOYEE ENGAGEMENT in the PRIVATE SECTOR BANKS, they are:

A: CULTURAL FACTORS:
   i) Motivation
   ii) Open Communication
   iii) Mutual Respect and Trust as well as a Risk Taking Culture

B: JOB RELATED FACTORS:
   i) Job Fit
   ii) Flexibility to work
   iii) Continuous Improvement

Recommendations

It is interesting to note that the findings go well with the general perception about Public and Private Banks. There is hardly any competition among employees in the public sector and at the same time each position is respected for the post more than the person. However, in the Private sector, where there is competition, where there is a lot of stress, a caring culture and growth & advancement obviously call for more engagement. The same explanation holds true for explaining why job satisfaction is a unique factor with Public sector banks and why commitment towards performance and feedback on participation are unique factors with Private sector banks as regards winning Employee Engagement is concerned.

Hence, it is recommended that both Private Sector Banks and Public Sector Banks learn from each other so that in either case Employee Engagement can be accelerated. No more are Public Sector Banks having a guaranteed growth as Private Sector Banks are posing a major challenge. It is for sure that an engaged employee will definitely bring better productivity. Hence, each should come out of their respective complacencies and adopt the best practices of the other sector.
