Women Entrepreneurship: Key to Success

Today's world is not static it is dynamic, more women are deciding to launch their own business for a variety of reasons.

1. To achieve for independence & flexibility.
2. To better balance work & family.
3. To make optimum use of technical education & qualifications.

Characteristics of Women Entrepreneurs

Women entrepreneurs tend to be highly motivated & self directed, they also exhibit a high internal locus of control & achievement. Researchers contend that women business owners possess certain specific characteristics that promote their creativity and generate new ideas and ways of doing things. Did you know that women-owned

businesses are one of the fastest growing segments of our economy, according to the Small Business Administration. If you have been considering starting your own business, now's a good time to get started.

Starting your own business takes a lot of know how starting with planning. You also have to know about preparation, financing and marketing. Add to that, is the importance of keeping an open and positive frame of mind. You have to believe you can succeed in order to make it a reality. One key characteristic of all successful entrepreneurs is that they have vision. They find a niche in a particular market and find a way to fill it. They give life to their vision/business and either personally or finding a way to make it happen. This "vision" keeps them focused and able to bring product or service to the market.

Entrepreneurs are also very self-motivated. They don't wait for someone to tell them to get to work. They are self-propelled and do the work because they want to. They know that it takes discipline and self-sacrifice to make their dreams come true. This is especially true when your business is still fledgling. At this stage it may be up to you to oversee and implement all aspects of the business. To make it work, you have to have an unflinching belief in yourself and your ideas.

Times will get hard. It's likely that your business won't be an instant success. Most new businesses fail in the first few years, so it takes courage to know that and still give it a go. The ones that do succeed know that it takes perseverance to make it happen.

Ladies, don't let others discourage you from living your dreams. Sure, you'll suffer setbacks and face hardship but you will also be richly rewarded if you stick with it. You will be able to be your own boss and see your ideas come to fruition. That's something most of us never experience. It's a comfort and a challenge to know that much of your success depends on what effort you expend.

Think hard before you decided to quit your present job and start your own business. It's doable but not without many sacrifices. Still, the rewards can be great if you're willing to put in the effort.

1. Sharp Communication skills.
2. Good interpersonal skills
3. Consensus building competencies
4. Very High level of Emotional Quotient.
5. Good decision making capabilities.

Problems faced by Women Entrepreneurs

The major problems encountered by Women Entrepreneurs are

1. Lack of Working Capital: To be Women & to do something on their own becomes quite difficult for them because of lack of Access to funds as Women do not process any tangibles security.

2. Motivational Factor: Self Motivation, Attitude to take up risk and behavior towards the business society, family support, financial assistance from public and private Institutions and also environmental suitable for Women to establish business units

3. The family structure is generally male dominated, hence the Male members think it a big risk financing the ventures run by women. Greatest deterrent to women entrepreneurs is that they are women.

4. The financial institutions are skeptical about the entrepreneurial abilities of women. The bankers consider women loonies as higher risk than men loonies. The bankers put unrealistic and unreasonable securities to get loan to women entrepreneurs.

5. Women's family obligations also bar them from becoming successful entrepreneurs in both developed and developing nations. "Having primary responsibility for children, home and older dependent family members, few women can devote all their time and energies to their business"

6. The male - female competition is another factor, which develop hurdles to women entrepreneurs in the business management process. Despite the fact that women entrepreneurs are good in keeping their service prompt and delivery in time, due to lack of organizational skills compared to male entrepreneurs women have to face constraints from competition.

CONCLUSION

According to the study it has been observed that Women are very good entrepreneurs, and prefer to choose the same as they can maintain work life balance. Even though we have many successful Women Entrepreneurs in our country, but as we have a male dominated culture there are many challenges which women entrepreneurs face from family & Society.
