Rana**

Associate Professor, AMITY University, Lucknow,

**ABSTRACT**

Architectural Journalism is a specialty of expounding on engineering and structure. Regularly, draftsmen and fashioners with a style for composing seek after Architectural Journalism. They get a bit of leeway of learning, while at the same time remarking on a work of engineering or a structure theory. In any case, an essential feeling of style and satisfactory perusing regarding the matter aides in understanding plan ideas all around ok to have the option to build up one's profession in this specialty of news-casting. Building structuring and arranging, inside planning, scene architecture etc. are a couple of controls incorporated under the enormous standard Architecture. Drawing connection between the outside and inside, what goes well with which plan component and what includes to the feel of the structure has dependably been the assignment each other architect needs to fulfill. The planner attempts to radiate feelings and involvement in the structure he forms. In any case, completes an architect dependably conveys to his group of spectators and his customers just by his plans? Does he simply manufacture an artful culmination and let the experience and the cross untold? Hence the conviction to include Architectural Journalism as the core course in Bachelor of Architecture syllabus is strongly agreed and accepted by various institutions imparting architectural education. One can order Architectural reporting into assorted subparts. It includes extreme aptitudes in structure understanding, perceptual thinking, and exploratory writing, documentation as far as photography, investigation and research. This stream as a vocation sets up its significance in being the impartial analyzer also the mindfulness advertiser of the plan world.

**KEYWORDS :** Documentation, Criticism, Creative Profession, Sensitivity, Exploration, Research, Architectural Interventions, Skill Based, Personalized Learning, Pragmatic Aspects, Novelties of Building Design

**INTRODUCTION**

The universe of Architectural Journalism is uncommon to numerous in India. Accordingly, the writer has set out upon this adventure to bring issues to light and disperse important data trying to familiarize the perusers with this subject. This interpretation of Architectural Journalism is an appearance of the creator's musings; it fundamentally rotates around the thoughts of stimulating open intrigue and gathering towards the oddities of structure plan while unpretentiously gesturing towards the developing domain of Architectural Journalism with an accentuation on passing on the correct plans to the perfect individuals in a request to outfit them with a viable and inventive point of view. The need of great importance is to express considerations and thoughts regarding the unmistakable style of Architecture in India through Architectural Journalism so our independence achieves the majority over the globe. The Art of Journalism in India in Architecture is rather nascent. The calling of Architectural Journalism is increasing much an incentive in contrast with that of being a customary planner over the globe. This can be ascribed to the way that separated from structuring, clarifying similar holds sheer significance to the extent defining a brand is concerned. Structural news-casting is likewise intelligent.

**IMPORTANCE OF ARCHITECTURAL JOURNALISM**

"Journalism is the truth that people need to know, and not what they want to know". This stream as a career establishes its importance in being the unbiased analyzer as well the awareness promoter of the design world. It has got its never-than-ever relevance now as this field demands newer ways of understanding and experience. This does not just involve mundane criticism, but also lets the designer know "What is being conveyed through their way of conveying" and also lets the reader/user know "What is been tried to convey". This is home run for designers who can understand the minds of the readers/users further-more and alter their means of communications and also correct the miscommunication if any. The scope of an Architectural journalist has widened and wizeden in recent times. There are innumerable magazines, web portals, blogs in India and around the world, which connect the writers and the readers through a palm-sized magic device Words are our most inexhaustible source of

magic, Architectural Journalism is a whole new wizardry which deserves to be learned, practiced and mastered.

Structural structuring and arranging, inside planning, scene architecture etc. are a couple of orders incorporated under the enormous flag Architecture. Drawing connection between the outside and inside, what goes well with which structure component and what includes to the style of the structure has dependably been the undertaking each other creator needs to fulfill. In any case, completes a fashioner dependably conveys to his group of spectators and his customers just by his structures?

**INCLUSION OF ARCHITECTURAL JOURNALISM IN ARCHITECTURAL CURRICULUM**

"Architecture arouses sentiments in man. The architect's task therefore, is to make those sentiments more precise." Said Adolf Loos. Probably, it is an architectural journalist's task to exhibit those sentiments more precisely in phrases & words. An architectural journalist is probably one who can take you into a journey of fantasy of experiencing the masterpieces, at your coziest drawing rooms, at your leisure with a small effort to bring forth the aspects of architecture and unveiling the path to view the beauty of the art piece speaking volumes and volumes." Various reasons for inclusion of Architectural Journalism in Architectural curriculum-

**"Rational Thinking in Architecture"**

Rational thinking in art and architecture refers to following a holistic approach that can incorporate the power of 'now' in our architectural endeavors. For taking any rational decision, it is important that all the parameters, which might get affected, be keenly observed. In architecture as well, rationalism comes into play when we need to consider diverse parameters that affect our point of consideration in one way or the other; doing so shall not be possible without architectural journalism. For example, when we have only a small portion exposed, we will not be able to figure out the complete message that it portrays, unless we have all the broader parameters analyzed through some medium like architectural journalism.

**Critical Appreciation about any Architect of your Choice"**

Criticism and populism are both important in their own aspects. The need of architectural writings, through these media, needs to be understood. All reality is an act of perception; and until there is a perception of happening, it has not happened yet. The work of architecture has to be brought to the limelight and has to be noticed. Later, criticism would decide its merit. Architecture is the biggest form of public art as it is rightly said, "Form follows fat wallets".

#### **"Critical Appreciation about any Structure of your Choice"**

For each of journalism and criticism, it becomes imperative that communication skills are honed into classrooms so that anybody who is up for taking up a profession in journalism or fancies criticizing artworks can do so without hesitation. A journalist, however, is more of a messenger, giving out details to people. Populism is the process of promoting or creating awareness about something among the populace.

#### **LEARNING OUTCOME OF ARCHITECTURAL JOURNALISM AS A CORE COURSE-**

This course intends to develop an element of inquisitiveness in student's thought process and equip them with technical writing skills. Also, it enables students to document the architectural works with the use of visual aids e.g. photography. Paraphrasing and summarizing given reports, Editing given materials. Writing original reports on design projects /buildings/forms and philosophies of Architects. Writing editorials for magazines and journals. Reporting activities like seminar, panel discussions, and conferences. Writing captions for pictures, programmers and events. Organizing materials for publication in newspapers, magazines etc. Understanding the printing process i.e. ejournals, journals, newspapers, newsletters, books etc. Understand copyright and plagiarism. Pedagogy for Course Delivery: Case Discussions, Presentations, Article writing

#### **SELF LEARNING**

It all depends on what you want to write about architecture. The general grade of design criticism is very poor in the country and as aspiring to be part of this network isn't very appealing. Magazines locally cater only to requirements of advertising therefore doesn't require much dedication to the reader. Ideally you should have a blog or any other self-publishing exercise to gauge if people actually like to read what you write. Or for that matter the content you produce. The need of the hour is to express thoughts and ideas about the distinctive style of Architecture in India through Architectural Journalism so that our individuality reaches the masses across the globe. Architectural Journalism.

#### **CONCLUSION**

Architectural Journalism is a territory which is to a great extent unexplored and is en route to turning into an effective profession decision for draftsmen and design understudies by and large. Presently, it is more as an interest for designers instead of a standard profession decision. It is frequently said that a designer's job is that of a generalist; that is one who not just needs to draw from numerous fields of learning, yet in addition cooperatively arrange that master information through plan procedure to in the long run make building structure. Condemning a structure based the information pool of the Architect is additionally part of such coordinated effort. The information picked up while at Architectural schools with comprehensive view for a design training and as an expert on field makes him a commentator. Compositional reporting can open ways to new types of request, affected an entire age of planners and fashioners during the 1990 s and the 2000's, through its scholarly tests into futurist goals and scrutinizing the more extensive design creations. Critiquing engineering is extremely an intense undertaking as there are numerous angles which can't be recognized as right or wrong, for example, feel; what may be delightful to somebody may

simply appear to be fake to another.
