

COMPREHEND THE ESSENCE OF HUMAN DIGNITY

Ms. S. Santhi Kumari Lecturer, Department of English, KBN College, Vijayawada

ABSTRACT

"No Power on this earth can destroy the thirst for human dignity"

Nelson Mandela

The purpose if god in creating man is to be happy and prosperous. Man is valuable in the world out of the entire creation. Man, in the process of prosperity, comes to the world with gifted potentiality and plenty of opportunities. However, it is an essential duty to channelize his potential into the possible right direction where he requires wisdom and rationality to be successful and to serve the purpose of his almighty verily. Man should comprehend himself: Man should understand himself how great, wonderful and valuable he is and for what purpose he is into the world. I firmly believe that "Man is a property to himself." A property should obviously be protected with complete care. It is his responsibility to protect himself from bad influence. It is natural to have changes and influences in life. Change, in other words is progress of man. Hence, man should be rational what kind of changes and influence that he undergoes. Because, either influence or change is meant for positive reinforcement but it never meant for negative. From my perspective, man should demonstrate himself in three dimensions broadly. They are the three I s' Intellectuality, Intelligence and Industrious. Man understanding out of his rich concern and close observation on the resources around, accommodate himself in these three dimensions effectively in his chosen area.

KEYWORDS : Comprehending Self Essence of Life, Human Dignity, Family, Society and Harmony.

INTRODUCTION:

The purpose if god in creating man is to be happy and prosperous. Man is valuable in the world out of the entire creation. Man, in the process of prosperity, comes to the world with gifted potentiality and plenty of opportunities. However, it is an essential duty to channelize his potential into the possible right direction where he requires wisdom and rationality to be successful and to serve the purpose of his almighty verily.

Man should comprehend himself:

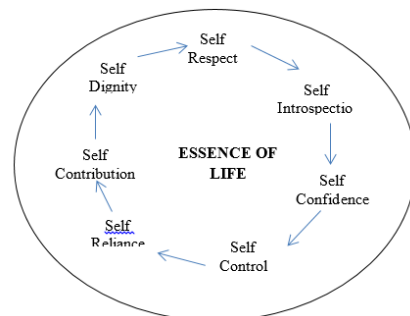

Man should understand himself how great, wonderful and valuable he is and for what purpose he is into the world. I firmly believe that "Man is a property to himself." A property should obviously be protected with complete care. It is his responsibility to protect himself from bad influence. It is natural to have changes and influences in life. Change, in other words is progress of man. Hence, man should be rational what kind of changes and influence that he undergoes. Because, either influence or change is meant for positive reinforcement but it never meant for negative. From my perspective, man should demonstrate himself in three dimensions broadly. They are the three I s' Intellectuality, Intelligence and Industrious. Man understanding out of his rich concern and close observation on the resources around, accommodate himself in these three dimensions effectively in his chosen area.

I stand for  Intellectuality
Intelligence
Industrious

Next, man also comprehend that his existence is not all of a sudden and alone. His existence in to the world out of a purpose of god and he is closely be related to the society for his social development by being associate with others at various contexts. It is an important element to observe and understand how human act and interact with each other in terms of sharing, caring, bearing, helping etc. As he is a valuable, his actions and relations are also equally important and valuable always with only his healthy perspective he can maintain healthy relations. It is possible if he is able to respect himself he also can respect his relations in the family and society. He alone can never develop healthy practices, culture and relations.

The self-understanding and awareness of man causes him to enrich his personality and well identified in the society. According to some eminent philosophers "Knowing self is a great thing and essence of life. If it is done at an early/right age, rest of his life remains comfortable and pleasant.

I find the following qualities which enable man to find the "essence of life:"

I recollect an interview of a celebrity, answered in this way, "Human body" for the question "What is so wonderful to you in this world?" He further extended his answer that he was surprised at the functioning of the 'Human Body' It is noteworthy to have a reference,

**I praise you because
I am fearfully and wonderfully made**
(Psalm 139:147)

Where king David applauded the artism of god for creating man wonderfully. Thus, it is the duty of man who properly execute his abilities, grab the opportunities and strive for in the right direction at the right time to place him in the greater heights where he can find human dignity.

Unfortunately, today man bothers to focus his ability on other issues such as deceiving others mentally, physically, socially, electronically, digitally and eventually losing his dignity at all these levels.

Family:

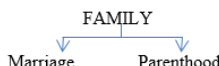

**The most important thing in
The world is family and love.-**
(John Wooden)

Family is a masterpiece of God's creation. Family is a combination of man and woman. They form a family. This is the universal concept. Families are close to God's heart. In fact, they were his idea. From the beginning when god created man, he said, "help-mate" suitable for him,

It is not good for the man to be alone
(Genesis 2:18)

Then he blessed them, be fruitful and multiply and replenish the earth
(Genesis 2:28)

There are two elements to construct a family....

Families, basically differ in terms of economic, cultural, social and many other facets. In other words, a family is defined, "A fundamental social group in society, consisting one or two parents and their children."

In a family man/ woman is passionate with other. They have a set of emotions, feelings and responsibilities to fulfil under a Bond. The Bond is marriage where love is an essential quality. This couple beget children. Then, everyone is precious to everyone in this Bond of Love and Marriage from the moment they enter till the end is called family. This family has a crucial role in the society by being a model of love in three aspects:

- 1. Love between husband and wife**
- 2. Love for children**
- 3. Love in promoting moral values.**

The Family has a decisive role having the capacity and responsibility to impact the entire society by its positive example. The parents must show love towards children by spending time with them and building intimate, personal relationships. Spouses must love each other according to fulfil its role in the society. The family will educate children in moral values. So that they will motivate themselves and pass on these values to future generations, making the society a happy and safe zone for all people to live and enjoy the livingness. The husband and wife relationship is to be a model, pattern of love by loving each other...its a cherishing and nourishing each other as the most precious thing in their lives. Its noteworthy to quote a Russian proverb which emphasises on this..

The Best Gift of a Father to give to his Children is to Love their Mother.
(Russian Proverb)

Such qualitative model families are need of the hour in the society. Because in most of the cases, there is a lack of such models for families and individuals by all means to see and imitate. If these principles are to be applied, then the society would change radically giving better happiness to the people as each generation follows in the footsteps of the previous generation.

The Family, further be a model and demonstrate the fact that the sexual relationship has a place only in marriage, between only a husband and wife. Mother and Father teach their children about the importance of maintaining the virginity until marriage and there is no such thing as safe sex outside of marriage. The family must promote marriage is being between one man and one woman and that any other marital relationship outside of this is harmful as well as dangerous.

Family is the threshold where the children imitate and follow the lifestyle of parents. Hence, it is obviously in the hands of the parents to guide the children in the way they should go comfortably. Provided, the family is to maintain domestic tranquillity, it further, remain a reliable source to avoid any kind of influence when the children grow up. If the family is strong with values only then we can have a good and strong society.

From a physical standpoint, biology, as it relates to heredity, is the key element in human development will be the most obvious

manifestation of family 's importance being physical features. Virtually everyone who sees a new born notes the similarities of physical traits shared by the baby and its parents. Yet, while eye and hair color, facial features and expressions and even the baby's gestures are familial characteristics usually asessed instantly. The physical influence of family on human development encompasses far more. Similarly the family influence the children in practicing the values towards the harmony of the society. As a matter of fact family is everything to man.

At this juncture, what I am glad to insist that why do we stand for promoting the moral values seriously. The parents should spend their time providing everything to family exclusively with the children. In the same ratio, the parents are loyal to instinct the children on inculcating their practices, habits and culture towards the ideal society. When standards of the family are strong, there is every possibility to have an ideal society. Parents are expected to be more cautious on the behaviour, friends circle, culture and the practices of children. Somewhere, somehow, something is missing.. as a result we have a news like this in every now and then Omar alias Subrahmanyam who turned as an informer to the terrorists (Date: 25/06/2017 Eenadu). The police authority found that there is an extreme change in his attitude from past to present as he spent twelve hours a day with internet, attracted to the terrorism. The youth may not die with unruly and rash driving.

Parents maintain relations with others but introspect whether all the relations are good and healthy and fair and frank. Today many of the incidents inform that the duty of parents doesn't end not just by providing property out of their mental and physical efforts, it further extends to provide them the healthy values, healthy relations and healthy attitude as a property to the children. It is possible when there is a harmony between parents and children.

Society:

**If Society fits you comfortably enough,
You call it Freedom**

(Robert Frost)

Society does not exist independently without an individual. On the other hand man is a social animal. He has a natural urge to live an associated life with others. Man needs for his existence or survival. The ultimate goal of society is to promote good and happy life for its individuals. It creates conditions and opportunities for the all-round development of individual personality. Society ensures harmony and cooperation among individuals. In spite of their occasional conflict and tensions. The society helps the individuals in numerous ways. Great man contribute to the society their wisdom and experience.

Man can never develop his personality, languages, culture and inner deep by living outside the society. The essence of the fact that man has always belonged to a society of some sort, without which man cannot exists at all. Society fulfils all his needs and provides security. Every human takes birth, grows, lives and dies in society. Without society human life is just like fish out of water. Hence this existence a great deal of close relationship between man and society. Both are closely inter-related, inter-connected and inert-dependent.

A society is a collection of individuals united by certain relations or models of behaviour which mark them off from others who do not enter into these relations or who differ from them in behaviour. So society is the hole complex of social behaviour and network of social relationships. As society is the system of relations among individuals which moulds our attitude, belief and ideas. According to MacIver,

"In the real world of man society and individuality go hand in hand"

Harmony, Sadhbhavana an Indian term occupies the most important place in man's life. It is complementary to the supreme human values of "Ahimsa" and symbolic of friendliness, and

therefore, it remains philosophy and went of life. Philosophy and vedas urge man for harmony to develop inclusive and wide – ranging friendliness among fellow beings and thereby create an atmosphere of peace leading to prosperity without harmony we can't go on appropriately and smoothly, hence there can be no success in life. It is this reason that harmony, through ages has been considered vital to life and continuous efforts have been made towards its realization and development in all walks of life.

Now the earth is rapidly converting into a global village. Causes and concern world over have become common and working together has become inevitable. In such a situation the significance of harmony multiplies many folds. Therefore it is the foremost the duty of each and every one to work for the harmony at all levels in all walks of life.

To conclude this paper, comprehending self is linked with family, family is linked with society and again society is linked with individual. So the discussed aspects in this paper are closely related with one another. It is just like Veena a musical instrument. It produces sounds / musical notes when all strings are perfectly arranged. Even if one string is not correct, it lost its melody in music, without melody we cannot enjoy the music. Here, the user of Veena should take necessary care to get it repaired to have melody in the music rather blaming the Veena. Similarly if something, wrong with society we never blame the society on the other hand it is the man to locate where problem is. Hence, each individual is just responsible for his action. We are liable to responsible for our action.

**For ELOHIYM shall bring every work into judgement with every secret thing whether it be good or whether it be evil.
(Ecclecastis: 12:14)**
