ABSTRACT
To measure shareholder Value Creation has been the issue of discussion has been the issue of discussion all around the world. It has become crucial since the companies were increasingly committing to creating shareholder value creation. Therefore new valuation methods are needed to use in company. However, the changing process from the traditional methods to the new ones is not easily welcomed. How then shareholder value creation is measured nowadays is of crucial importance since the majority of them are still using the traditional methods to the new ones is not easily welcomed. How then shareholder value creation is measured nowadays is of crucial importance since the majority of them are still using the traditional accounting measures. Having noticed this study is an attempt to analyze the value creation with help of VBM method from current position analysis.

Introduction:-
It is seen crucial all over the world. In Sweden the new measurement systems of shareholder Value creation were introduced in the last decade and have been slowly introduced in various companies have made the creation of shareholder value one of their key corporate objectives.

Many factors can affect shareholder value such as the environment surrounding the firm, weaker business climate, political situation and currency fluctuations we are not cover above factors in our research paper only general information can cover on it.

Value Based Management Method(VBM):-
VBM method is the management philosophy and approach that enables and supports maximum value creation in organization, typically the maximization of shareholder value. VBM encompasses the processes for creating, managing and measuring value.

The value creation process requires an understanding of attractiveness of the market where one's competitors, coupled with one's competitive position relative to other players, once this understanding is established and is key value chain drivers for cash flow and profitability competitive strategy can be established or modified to maximize future returns.

Value Base Management is dependent on corporate purpose and the corporate value.

The corporate purpose can either be economic (shareholder value) or can also aim at other like shareholder value.

This model shows how to work with value based management method. Organizational process will be started with many activities which are shown above figure above figure examine whole activities which are work in the procedure of company.

7's Model Of Value Based Management Method:-

Together these factors determine the way in which are shareholder value creation and measurement:

(1) Shared Value:-
Shared value is central beliefs and attitudes.

(2) Strategy:-
More factors like resources, over time, identified goals, Environment Competition, customers accept it.

(3) Structure:-
The way of organization's units relate to each other.
