ABSTRACT *Agriculture forms the backbone of the Indian economy. Agripreneurship can help in the growth and development of the economy in a variety of ways. However, the sector is faced with problems relating to credit, infrastructure, marketing, technology, legal formalities and regulations etc. among which insufficiency of finance being the most important one. With this background, this paper has examined the finance provided for agripreneurship development by the scheduled commercial banks (SCBs) in Sonitpur district from 2009-10 to 2013-14. From the study, it becomes clear that despite the continuous efforts, there exists a substantial gap between the requirement of credit and supply of agricultural credit. The findings suggest that agripreneurs should be provided finance at concessional rates of interest and on easy repayment basis.*

Introduction

Agriculture all over the world is going through a phase of transition. In this changing scenario, agriculture is taking new shape and expanding its scope beyond the limits of mere crop cultivation and animal husbandry for livelihood of rural population. In recent years, there has been a considerable emphasis on crop diversification towards horticulture (fruits, vegetables, ornamental crops, medicinal and aromatic plants and spices), plantation crops (coconut, cashew nuts and cocoa) and allied activities. The problems of unemployment, underemployment and disguised unemployment have swamped the country, especially the rural common people. Considering that 2/3rd of the Indian population is employed in the agriculture sector, providing viable and sustainable business opportunities in Indian agribusiness is essential for generating employment in the country. (Nagalakshmi et.al. 2013)

Agripreneurship is an employment strategy that can lead to economic self-sufficiency of rural people. An agripreneur may be defined as someone who undertakes a variety of activities in agriculture and its allied sectors. A farmer to become a successful agripreneur needs to be active, curious, determined, persistence, visionary, hard working, come up with ideas, communicative with strong management and organizational skills, recognize suitable marketing opportunities, and manage the optimum resources or bearing the risk. Agripreneurship is greatly influenced by three factors namely the economic situation, education and culture in India. Various studies indicate that if the right environment is created and farmers are provided with good infrastructure, technology and timely availability of credit through financial institutions it can enhance food production and can ensure food security, income and quality of life for the farmers. (Tripathi et.al., 2015)

Scope of Agripreneurship in Sonitpur district of Assam

The economy of Sonitpur district is primarily agriculture based with approximately 80% of its population dependent on agriculture and allied activities. Rain-fed cultivation of paddy (single crop) continues to be prevalent in the district. However, multi-cropping is also gradually gaining popularity. Piggery, Poultry, Dairy, Fishery, Sericulture are important allied activities in the district. Considering all these potentialities, there is increasing scope for agri-

preneurship development in Sonitpur district (*Potential Linked Credit Plan, Sonitpur District, 2012-13 to 2016-17*).

Statement of Problem

There are various factors responsible for paucity of entrepreneurship in a country including agripreneurship. Among the various factors, access to capital is an important constraint. Government, banking and financial institutions have taken several steps for the efficient growth of entrepreneurship in agriculture. Though they provide various assistances, it is found that agripreneurs do not avail these benefits of the government uniformly. It has been observed from the study of the Annual Reports of Lead Bank that banks always fail to achieve its target for financing agripreneurs. For the quarter ended March 2014, advances to agriculture sector accounts for only 26% to total advances by all SCBs. Again, the Govt. introduced various schemes for rural entrepreneurship development like KCC, SGSY, PMEGP, Kalpataru etc. But the progress under these schemes is not satisfactory. As on 31st March 2014, under KCC, the amount targeted for Sonitpur district was 502079 thousand while the amount sanctioned was only 432020 thousand (*Annual Credit Plan, Sonitpur District, March 2014*). Thus from the preliminary study it has been found that status of bank finance for agripreneurs in Sonitpur district is not satisfactory.

Objectives:

- To examine the extent of financial assistance provided by the Scheduled Commercial Banks for agricultural activities in Sonitpur District.
- To examine the performance of Scheduled Commercial Banks with regard to agriculture sector advances in Sonitpur District.
- To offer suggestions in the light of the findings.

Methodology:

The study is descriptive and analytical and is based on secondary data. The secondary data were collected from the Annual Credit Plans of Sonitpur district published by UCO Bank which is the Lead Bank in the district. The study covers a period of 5 years from 2009-10 to 2013-14. The secondary data collected from Annual Credit Plans have been presented in suitable tables. Percentage analysis has been done to know the performance of scheduled com-

mercial banks with regard to promotion of agripreneurship.

trend during the period.

Findings and Discussion:

Target and achievement of advances to agriculture sector:

The Lead Bank plans the sector wise target for priority sector lending to each participating financial agency in the district. Agriculture is one of the important components of priority sector. The allocated share is called target. The following table-1 exhibits a comparative study of target and achievement reveals the performance for the study periods.

TABLE-1
Extent of financial assistance provided by the Scheduled Commercial Banks for agricultural activities in Sonitpur District.

(□ in thousands)

As on 31 st March	Total Priority Sector Advance (1)	Total Advances to Agriculture sector (2)	(2) as percentage of (1)
2010	55,45,174	17,27,868	31.16
2011	63,69,088	20,71,568	32.53
2012	62,02,812	28,09,257	45.29
2013	82,70,512	35,47,949	42.90
2014	97,27,358	37,44,405	38.49

Source: Annual Credit Plan, Sonitpur District, 2009-10 to 2013-14

The table -1 shows that the proportion of agriculture credit in the total priority sector advances have increased over the periods. But the share to agriculture sector compared to total priority sector advances have shown a fluctuating

TABLE-2

Performance of Scheduled Commercial Banks with regard to agriculture sector advances (in thousand)

Year	Target	Achievement	Percentage of achievement
2009-10	4,39,945	4,13,757	94
2010-11	5,23,850	4,54,212	87
2011-12	7,97,140	5,31,113	67
2012-13	14,09,470	7,62,570	54
2013-14	18,51,214	9,66,270	52
Total	50,21,619	31,27,922	62

Source: Annual Credit Plan, Sonitpur District, 2009-10 to 2013-14

Note: Percentages are calculated and figures are rounded off.

Table-2 shows that the percentage of achievement for agriculture sector advances varies between 94% and 52%. The table also reveals that the percentage of achievement gradually falls over the five year study period which may indicate insufficient credit flow in the agriculture sector hampering promotion of agripreneurs in the study region.

Bank-wise Performance of Scheduled Commercial Banks with reference to agriculture sector

Most of the SCBs have their branches in Sonitpur district. Bank wise target, achievement and percentage of achievement for five years from 2009-10 to 2013-14 have been depicted in Table3.

Source: Annual Credit Plan, Sonitpur District, 2009-10 to 2013-14

Note: Percentages are calculated and figures are rounded off.

Table-3 shows that the amount allocated as target was steadily increased over the period in case of all banks. With regard to bank-wise performance of agriculture sector advances it is seen that the achievement percentage is not uniform over the five years. The performance of banks like SBI, UCO bank, CBI, PNB, UBI etc. are satisfactory while it is very poor for Indian Bank, Indian Overseas Bank, Vijaya bank etc.

Conclusion and Suggestions:

Agriculture is the mainstay of the Indian economy. But from the present study, it is observed that advances to agriculture sector are not up to the level. Considering this situation, the following suggestions may be considered relevant for the development of agripreneurship.

Awareness campaign should be arranged among the agripreneurs. Through the programme they should be made aware of the various provisions available for them. It is necessary to make them understand that loans are advanced for undertaking agripreneurial activities.

The agripreneurs should be provided finance at concessional rates of interest and on easy repayment basis. The cumbersome formalities should be avoided in sanctioning the loans to agripreneurs.

Banks may consider providing adequately qualified and trained personnel in rural and semi urban branches to accomplish the targeted mission.

Banks should establish customer support relations with borrowers rather than simply lending to the agripreneurs. This will help to reduce the risk associated with lending to entrepreneurs.

Agripreneurship is the need of hours to make agriculture a more attractive and profitable venture. It is clear that there is a great scope for entrepreneurship in agriculture and this potentiality can be tapped only by effective support to this sector. The agriculture sector has large potential to contribute to the national income while at the same time providing direct employment and income to the numerically larger and vulnerable section of the society. Agripreneurship is not only an opportunity but also a necessity for improving the production and profitability in agriculture and allied sector (Bairwa et al., 2014). Hence, adequate infrastructural support including credit is highly desirable for promotion of agripreneurship. The scheduled commercial banks can play a pivotal role to augment for promotion of agripreneurship.
