ABSTRACT

Indian Astrology is a useful and path-leading science since VEDIC era, but its use in medical is perhaps the most important one. Is it not a fact that mystery of so many diseases and health troubles is still unrevealed even by much advanced modern medical science. The astrological and planetary connection to various diseases has already been established beyond the shadow of doubt by our wise sages of ancient time, but much of their knowledge had not percolated to posterity with the passage of time and lack of proper scientific approach could not make much headway in this arena of Predictive Medical Astrology Zone. Medical Astrology is a proven and an invaluable diagnostic tool that leads to speedy recovery and lasting cures.

Introduction:- Indian Astrology is a useful and path-leading science since VEDIC era, but its use in medical is perhaps the most important one. Is it not a fact that mystery of so many diseases and health troubles is still unrevealed even by much advanced modern medical science. The astrological and planetary connection to various diseases has already been established beyond the shadow of doubt by our wise sages of ancient time, but much of their knowledge had not percolated to posterity with the passage of time and lack of proper scientific approach could not make much headway in this arena of Predictive Medical Astrology Zone. Medical Astrology is a proven and an invaluable diagnostic tool that leads to speedy recovery and lasting cures. Once a person knows to what diseases he is primarily susceptible, he can guard against them from the beginning and thus live a long and healthy life. In this unit various forms of diseases and its planetary combinations were revealed.

Kalapurusha concept

In Astrology the twelve signs of the zodiac are compared to a 'Kalapurusha'.

Sign	Part of the body
1 Aries	Head
2 Taurus	Face
3 Gemini	Neck, shoulders & hands
4 Cancer	Chest, heart & lungs
5 Leo	Upper abdomen
6 Virgo	Lower abdomen
Sign	Part of the body
7 Libra	Groin, buttocks, semen
8 Scorpio	Genital, urine
9 Sagittarius	Thighs
10 Capricorn	Knees
11 Aquarius	Legs below the knee including ankle
12 Pisces	Feet

Bhava and parts of the body

Parts of the body starting with Ascendant

Ascendant	Head and brain
2nd house	Face, right eye.
3rd house	Neck and right ear.
4th house	Heart, lungs and chest
5th house	Upper abdomen and mind

6th house	Lower abdomen
7th house	Groin, buttocks and semen
8th house	Genital and urine
9th house	Thighs and limbs
10th house	Knees
11th house	Legs and left ear
12th house	Feet and left eye

Planets representing different organs

Sun	Stomach, bone, heart, eyes, head, general constitution of the body.
Moon	Blood, heart, lungs, fluid in the body limb, mind, kidney and muscle.
Mars	Marrow, blood, vitality, head, veins, neck, rectum
