**INTRODUCTION**

Ayurveda, the Indian traditional health care system (ayus- life, veda- knowledge, meaning science of life), is the oldest medical system in the world and is being revived in its complete form under the name of Maharishi Ayurved (Glaser, 1988). The World Health Organization has approved its efficacy (Zaman, 1974). This system provides an approach to prevention and treatment of different diseases by a large number of medical procedures and pharmaceuticals. Generally plant resources constitute an important natural wealth of a country. They play a significant role in providing primary health care services to rural people in addition to large number of economic products. According to the World Health Organization, more than 80 % of the world's population relies on traditional herbal medicine for their primary health care. These medicines are relatively safer and cheaper than synthetic or modern medicine. Herbal remedies used in folk medicine provide an interesting and still largely unexplored source for the creation and development of potentially new drugs for therapy which might help overcome the growing problem of resistance and also the toxicity of the currently available commercial antibiotics/pesticides and discovery of new bioactive compounds. Therefore, it is of great interest to carry out a screening of these plants in order to validate their use in folk medicine and to reveal the active principle by isolation and characterization of their constituents. Over the years of trial and errors, they have accumulated a great deal of knowledge on the utility of surrounding biodiversity. This traditionally occupied knowledge is transmitted by oral means and is mostly acquired through learning-by-doing approaches. The plant based resources form a large share on which rural communities depend for food and medicines. The traditionally occupied ethnomedicinal knowledge is mostly, at present, restricted to far-flung areas away from invasion of modern cultural forces.

The knowledge of medicinal plants has mainly been gathered by the people in the form of tradition and experiences and inherited over the centuries to the future generation. It is extremely important to save this traditional knowledge of biological heritage and explore new resources.

The list of the plants and their medicinal uses are given below (Table I):

</table>
| 3 | Musa paradisica | Musaceae | Kela | Flower  
|   |              |          |     | I. Dysentry – Soup of Banana flower  
|   |              |          |     | Stem  
|   |              |          |     | I. Vomiting – Juice of Banana stem mixing with honey  
| 4 | Syzygium Cuminii | Myrtaceae | Jamun | Bark  
|   |              |          |     | I. Dysentry – Juice prepared from Bark of Jamun or soup.  
|   |              |          |     | Fruit  
|   |              |          |     | I. Stomach pain – Juice of its fruit taking two times a day.  
|   |              |          |     | II. Piles – Fruit of Jamun with salt eating 1-2 month continuously.  
| 5 | Mangifera indica | Anacardiaceae | Aam (Mango) | Fruit  
|   |              |          |     | I. Loo - Roast Mango and pour cold water over it. When mango becomes cold then prepare juice from it and drink it per hour. Also rub roasted mango seeds left after preparing juice all over whole body and afterwards take bath.  
|   |              |          |     | Leaf  
|   |              |          |     | I. Diabetes scurvy –  
|   |              |          |     | 1. Eating New Leaf of mango  
|   |              |          |     | 2. Making Paste of new leaf of mango and eating two times a day with spoon.  
|   |              |          |     | II. Body Pain – Boiled the old leaf of mango and take bath with that water.  
|   |              |          |     | Bark  
|   |              |          |     | I. Jaundice – Two spoon juice of root or Bark of mango and mixed with water taking three times a day for 3-5 days.  
| 6 | Artocarpus integrifolia | Moraceae. | Kathal(Jackfruit) | Seed  
|   |              |          |     | I. Tuberculosis (T.B) – Take half ripe jackfruit in which seeds are covered. Keep that part in a glass jar adding equal proportion of brown sugar in it. Tightly pack the mouth of jar and keep it under the sun for 40 days till juices prepared from it.  
|   |              |          |     | Method of taking:- One big spoon full of juice adding sprinkle of Acorus colamus paste and take it in empty stomach three time a day for 3-6 month. Also properly mix one egg in a glass of warm milk and two big spoon of brandy and take it in the morning.  
| 7 | Aegle marmelos | Rutaceae | Bel | Juice  
|   |              |          |     | I. Fever, Tonsil :- Juice of onion, ginger and lemon is to be mixed with 15 ml of honey and is to be taken two or three times a day.  
|   |              |          |     | II. Ear Pain :- Warm the juice of onion and put 4-5 drop in ear.  
|   |              |          |     | Onion:-  
|   |              |          |     | I. Cholestrol, Heart diseases :- Eat 1-2 onion everyday  
|   |              |          |     | II. Prevents heat stroke :- Take onion with food.  
|   |              |          |     | III. When bee or worm bite :- Cut the onion and rub the affected part.  
|   |              |          |     | IV. Fainting :- Sniff the onion  
|   |              |          |     | V. Wound, Tumour:- Make the paste of onion and mix it with oil and put on the affected part.  
| 8 | Allium cepa | Amaryllidaceae | Pyaz(Onion) | Garlic  
|   |              |          |     | I. Tumour, Ulcer :- Make paste of garlic and mix it with sweet oil (like coconut oil) and put it.  
|   |              |          |     | II. Typhoid :- Fresh Juice of garlic with fruit juice. Take 2 spoon after every four hours.  
|   |              |          |     | III. Fever, dry cough, high blood pressure, asthma, worm in stomach diseases related to neck :- Method of preparing :- Peel the Garlic and put in the glass jar and add honey and keep it for 40 days.  
|   |              |          |     | Amount :- Two piece garlic with honey take in empty stomach.  
|   |              |          |     | IV. Clean the wound:- Juice of garlic and water in ratio 1:1 and use it.  
| 9 | Allium Sativum | Amaryllidaceae | Lahsan(Garlic) | Leaf  
|   |              |          |     | I. Diabetes, fat, cholesterol :- Eat every morning 10 leaf.  
|   |              |          |     | II. Insect bite :- Apply juice of Kari patta and lemon in equal quantity.  
|   |              |          |     | III. Cracks on the feet :- Make paste of Kari patta, Mendhi, fresh Turmeric and milk of pepal in equal quantity and apply it before going to sleep for a week.  
|   |              |          |     | Discoloration around the eyes:- Make paste of Kari patta with cheese and apply.  
| 10 | Murraya koenigii | Rutaceae | Kari patta |
II. Block in the nose due to cold: - Put the drop of oil in the door of nose and outside the nose before sleeping. (For little children it is harmful)
III. For vomiting when poisons are eaten: - Make powder of 5-10 gm of sarso, add water and consume.
IV. For cleaning the wound: - Put ghee in the powder of sarso and honey.
V. Ring worm: - Clean the affected area with hot water and apply the paste of sarso. After 10 minutes wash it.
