ABSTRACT

The life span of Sravana Star will pass through ups and downs recurrently. The natives will attain their achievements from most challenging situations. This may trigger suspiciousness among others which makes their life chaotic habitually whereas the factor of fortune will favour their situations to tide over the predicaments. They are identical and knowledgeable about different subjects and shine in a leading role as trustworthy adviser to others. They will gleam as common friend of others and support to solve problems in their life. They find appropriate solutions to problems using own ability to intermediate the situations. They dislike to work under the control of anybody and aspiring independence, privilege and respect. The financial status may not match with their ability and knowledge. Some of the traits show a greedy nature whereas others feel as arrogant. They are very simple, healthy and fine-looking personality and express good individuality both in words and deeds.

Introduction:-

Shravana is a socially active nakshatra which revels in public dealings. It has a very businesslike approach to things, even though maintaining cordiality is its primary objective. If this nakshatra is rising on the Ascendant, the person is likely to be mature in their approach, cunning, well mannered and receptive with an alert look. The appearance is a mix of Moony softness and saturnine rigidity. Such people are usually clever in conversation and are skilled at putting others at ease quickly. In the present day and age, most of them can be seen spending a whole lot of time on the telephone! Whether a native under the influence of this nakshatra will listen more or speak more, depends upon the planet posited in this asterism. For example, if Saturn is posited in this nakshatra, one will tend to listen more and may find speaking difficult, while a person who has Mars placed in this nakshatra can be quite a chatterbox, but may not be well – versed in the art of listening. Here we review two horoscopes shravana born natives.
