ABSTRACT

No more a fatal disease, Aplastic Anemia treatment found in Homeopathy. A lifesaver for aplastic anemia patients, homeopathy has the root cure. Also known as bone marrow aplasia, aplastic anemia is a bone marrow disorder, caused due to multiple reasons. The disease was declared fatal due to less effective treatment, but homeopathy medicine has discovered the cure and has been a lifesaver for many. Treating the core disorders, homeopathy presents a root cure for the disorder, while also saving lakhs from bone marrow transplant or ATG treatment. In this paper we have discussed the Homeopathic cure of Aplastic Anemia.

KEYWORDS

Aplastic Anemia, Homeopathy, Root Cure, Marrow Aplasia etc..

INTRODUCTION

The bone marrow disorder, similar to MDS (myelodysplastic syndromes) causes the bone marrow to stop producing new blood cells, causing a condition called pancytopenia, where the blood loses its three main components, red blood cells, white blood cells, and platelets. This results in fatigue, abnormal and uncontrolled bleeding, and being prone to infections and diseases. The disease can be a side effect of chemotherapy, exposure to radiation, some drugs, or birth disorder, which results in the failure of bone marrow to produce new blood cells. The disorder can affect men and women, in adult age and even children. To treat this, the patient needs to go through a blood transfusion, ATG treatment, or bone marrow transplant, which also does not ensure a total cure. It is often confused with cancer, but aplastic anemia is a whole different and even more deadly condition than cancer.

What are the symptoms-

Aplastic anemia causes stem cell damage, that leaves the bone marrow empty or with some blood cells, in a condition known as hypoplastic marrow. The major visible signs of the disorder can be prolonged fatigue, shortness of breath, rapid or irregular heart rate, prolonger of frequent infections, skin rash, dizziness, and headache, something that can seem normal to one in the initial stage but requires attention. As the severity increases, the platelet counts fall below 10,000, the fever turns often, and one experiences unexplained and uncontrolled bleeding. It can be prolonged mensuration bleeding, blood may come from the eyes, nose, gums, or even rectum.

How Homeopathy treats it-

As Dr. A.K. Dwivedi says, homeopathy works in steps and all root causes. The treatment works on increasing platelets by stopping the destruction of the cells by the bone marrow. This controls excessive bleeding and protects the patient from losing hemoglobin and catching other infections. This also works on repetitive fever, to hinder weakness and cell destruction. Working on all factors at once, homeopathic medicines strengthen, and trigger bone marrow to function properly, curing the disorder. The treatment is safe for diabetic patients as is taken out from suitable medicines, and served to the patient in a diluted form.

"Since the causes are unique to every patient, the treatment and approaches are unique too. We monitor the needs and gaps caused due to the disease in the patient and treat them with medicines and an appropriate diet," said Dr. Dwivedi. He further adds "the patients need to understand that blood transfusion is not the cure, as the bone marrow destroys as many cells as one injects in the body. Homeopathy does not work on covering the symptoms but cures the dysfunction itself."

Dr. Ashvini Kumar Dwivedi is a homeopathy practitioner, chairman of Advanced Ayush Wellness Centre, and director of Advanced Homeo Health Centre and Homeopathic Medical Research Pvt Ltd Indore, is a

well-known, and trusted name in homeopathy health care. Armed with B.H.M.S., M.D. (Homeo), F.H.C.H. (London U.K.), PhD, and M.A. in Yoga. He dedicated his 25 years to healthcare and medicine, working on the cure of aplastic anemia treatment he developed a unique homeopathy treatment and medicines to help people overcome the disorder.

Role of Homeopathy in Aplastic Anemia:

- Homeopathy medicines attempt to stimulate the healthy portion of bone marrow to improve cell production. This may help to reduce the number of blood transfusions.
- Homeopathy medicines improve general vitality and wellbeing of a patient to help him fight infections.
- Homeopathy medicines can be useful to control bleeding disorder associated with Aplastic anemia.
- Homeopathy medicines are beneficial in countering sideeffects associated with conventional therapy.
- Homeopathy medicines have a very effective long-term beneficial effect or preventive effect in terms of countering genetic tendencies and balancing disturbed immunity that are root causes of this serious malady.

The chances of relapse significantly diminish with homeopathy treatment. Homeopathic medicines help in maintaining the normal range of red blood cells, white blood cells, and platelets

Many patients attending my clinic in Indore from all over India & abroad suffering Aplastic Anemia, Pancytopenia, Hypoplastic Bone marrow, who has done platelet, PRP, SDP transfusions may time before approaching me & many of them are taken ATG treatment Cyclosporine & Steroids but without any fruitful results, their platelets decreases even below 10000 within week or even in 4-6 days.

Following are the Homeopathic medicines prescribed to different patients:

ACETIC ACID	KALI PHOSPHORICUM
ACONITUM NAPELLUS	MANGANUM
ARSENICUM ALBUM	MEDORRIHUM
BORAX	MERCURIUS
CALCAREA CARBONICUM	NATRUM MURIATICUM
CINCHONA OFFICINALIS	NITRIC ACID
FERRUM METALLICUM	PHOSPHORUS
FERRUM ARSENICUM	PLUMBUM
GRAPHITES	SQUILLA
HELLEBORUS NIGER	SULPHUR
KALI ARSENICUM	SULPHURIC ACID

CONCLUSION

Patients suffering from Aplastic Anaemia consulted for Homeopathic

Treatment. Most of them are benefited in most shortest duration by using 50 milisimal potency of medicines on the basis of symptoms totality & after proper assessment of their investigations. Homeopathic medicines prescribed which gives desired relief in symptoms.
