The data were analyzed using descriptive statistics of frequency counts and parentage for the research question was used to assess it there was a significant difference in facilities/equipment as predictor of sports

KEYWORDS
Sports Facilities, Likert Type Questionnaire.

Introduction:
It is common knowledge today that the attainment of World class status in sports is a reflection of development objective of a country. Government of India launched Panchayat Yuva Krishi aur Khel Abhiyan (PYKKA) for development of sports in country. The Rajiv Gandhi Khel Abhiyan (RGKA) was launched by the Congress-led United Progressive Alliance (UPA) government in February 2014 to replace Panchayat Yuva Krishi aur Khel Abhiyan (PYKKA). When Bhartiya Janata Party came to power the government has merged Rajiv Gandhi Khel Abhiyan (RGKA), launched by the previous UPA government, with the Khelo India programme for development of sports. Two other sport projects launched by the previous regime, that is, Urban Sports Infrastructure Scheme and National Sports Talent Search Scheme, have also been merged under Khelo India for better development of sports. Sports policies changed with the government but one thing is common that is development of sports. If the sports facilities are properly developed with the view of sports performance in future then there is no need to change the name of Policy because sports performance directly depends on equipments and sports infrastructure. Having the right quality and quantity sports facilities and equipments is an integral parts of sports development. To a large extent, this is partly what makes the difference between the sports culture of developed and developing nations. In the developed world, sports facilities and equipment of the appropriate standard are available of promote the athletes performance (Ojeme, 2000).In support of this view, Talabi (1998) opined that most developing countries wish to arrive at the level of developed countries over night. While developed countries are putting so much into providing excellent facilities, equipment and conducive environment for athletes, developing countries seems to lag behind in the provision of these amenities and the cultural standard and the success of a sports programme. Dankadai (2011) stated that many of our play grounds have disappeared and most schools have no sporting facilities and equipment as was the case before. Over the years, sports grounds were converted into residential purposes and the few ones that still exists especially in the United States. Indian athletes in better standard than the home based. Availability of facilities and equipment determine the standard and the success of a sports programme. Dankadai (2011) stated that many of our play grounds have disappeared and most schools have no sporting facilities and equipment as was the case before. Over the years, sports grounds were converted into residential purposes and the few ones that still exists especially in educational institutions are not properly maintained. Therefore, the main purpose of this study is to investigate if facilities/equipment would predict sports development in Allahabad, Uttar Pradesh.
development in Allahabad, Uttar Pradesh. 0.05 level of significance was used for the statistical test of significance

Discussion:

It is common knowledge today that the attainment of world class status in sport is a reflection of development objectives of a country. In support of this view, Talabi (1998) opined that most developing countries wish to arrive at the level of developed countries over night. While developed countries are putting so much into providing excellent facilities, equipment and conducive environment for athlete’s developing countries seems to lag behind in these amenities and expect their players or athletes to excel in the international arena. He further stated that one area of poor start is in the provision of facilities. Facilities are virtually not in existence and when available they are grossly poor or substandard.

Because they got proper sports facilities in Allahabad. So we can say that sports facilities are necessary for better performance in games and sports. The development of sports facilities be planned and taken in phases having in view the various sports and the cultural interest of the people through planned annual target, while also private interested individual should be solicited and encouraged.

Conclusion and Recommendation:

The findings of this study confirmed that Sports facilities/equipment is a predictor of sports development. Abhinn Shyam Gupta played in 2004 summer Olympics in Badminton and received Arjun Award, Mohammad Kaif cricketer, Danish Mujtaba hockey Player, Ashish Kumar Gymnasts Arjun Awardi, Yogita Kumari Soft Tennish player Rani Laksmi Bai Award many more player who belongs from Allahabad gave performance at International level because they got proper sports facilities in Allahabad. So we can say that sports facilities are necessary for better performance in games and sports. The development of sports facilities be planned and taken in phases having in view the various sports and the cultural interest of the people through planned annual target, while also private interested individual should be solicited and encouraged.
